

To whom it may concern,

I am a student at MCAST Institute of the Creative Arts (Mosta). I Completed the course Advanced Diploma in Art & Design Level 3-4, I am currently studying on my bachelor's degree Graphic Design Level 5.

I gained experience from the course workshops, art drawings with different types of media, Graphical Communication and Graphical using AutoCAD digitally drawing plans, and products.

I started my journey on graphic design since I can design anything I want for myself or others while still satisfying actual market demands, this career choice appeals to me since it blends creative freedom with practical demand.

I am interested in your work and would like to cooperate with you. I think this position would be an ideal chance for me to improve my digital abilities and help you with my distinct graphic project style.

Please let me know if there are any opportunities. Your response would be greatly appreciated,

Sincerely,

Kurt Bonnici
